According to our (Global Info Research) latest study, the global Degradable Mailer Plastic Package market size was valued at US$ 300 million in 2025 and is forecast to a readjusted size of US$ 607 million by 2032 with a CAGR of 10.7% during review period.

A degradable mailer plastic package is an environmentally friendly alternative to traditional plastic mailers, designed to reduce plastic waste and minimize environmental impact. These mailers are made from materials that break down more rapidly under environmental conditions, such as exposure to sunlight, moisture, and microorganisms, compared to conventional plastics. Typically used for shipping and packaging purposes, degradable mailers offer similar strength and durability to their non-degradable counterparts while ensuring that they degrade into non-toxic residues over time. This innovative packaging solution caters to the growing demand for sustainable practices in e-commerce and logistics, contributing to a reduction in long-term plastic pollution.
