The global Dehydroquercetin (DHQ) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Taxifolin (often referred to as dihydroquercetin) is a flavanonol which is a part of the phytonutrient family (a set of chemical materials that occur evidently in flora and have more than one fitness benefits). Most of the taxifolin manufacturers are located in Russia and China. It is due to the easy availability of raw materials in these countries. Conifers such as Siberian larch can be commonly found in these countries, thus making them the production hub of taxifolin. Russian government has also been investing in the production of taxifolin, especially in the Magadan region. The production of taxifolin in Russia accounts for about 60% of the total global production.

This report studies the global Dehydroquercetin (DHQ) production, demand, key manufacturers, and key regions.
