Abstracts

CBCT is a 3D medical imaging technique comprising an X-ray, which can be used for complex dental treatments. It helps dentists to evaluate diseases (endodontic and periodontics) in the jaw or teeth, to understand the bone structure of the maxillofacial region for surgery, and to evaluate soft tissues around the jaws for dental implants.

Scope of the Report:

This report focuses on the Dental Cone Beam Computed Tomography in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global dental cone-beam computed tomography (CBCT) market will witness impressive growth and post a staggering CAGR of more than 12% over the forecast period. With the growing number of dental schools and dentists, the market for dental CBCT is expected to have a positive outlook in the coming years. The increasing number of dental specialty hospitals and laboratories in the Americas and Europe is leading to the augmented adoption of CBCT in these regions. In the Americas, the market's growth is high as public-private dental schools are increasing. With the increasing dental problems in the region, there is a high requirement for dentists, which can be fulfilled by the growth of dental schools in the market.

The global dental CBCT market is characterized by the presence of intense competition among the global and local manufacturers. Factors like advances in technology and product upgrading will increase the competition among manufacturers.

In terms of geography, the Americas led the global dental CBCT market during 2015 and is likely to dominate the market over the next four years. The growth of this market

in the region is attributed to the increasing number of dental implant procedures and radical improvements in dentomaxillofacial surgeries in the Americas. The use of dentomaxillofacial radiology has increased after the introduction of CBCT application in dental services as it helps in soft tissue examination, temporomandibular joint examination, and plaque detection. The extensive application of CBCT will lead to its increased adoption in the region, especially in countries like the US and Canada. The worldwide market for Dental Cone Beam Computed Tomography is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
