Dental disclosing tablets are oral hygiene aids designed to reveal dental plaque on the surfaces of teeth. Containing food-grade dyes, these chewable tablets are used before or after brushing; once chewed, the dye adheres to plaque and stains it in visible colors (such as red, blue, or purple), helping users identify areas that were inadequately cleaned. These tablets are safe, easy to use, and commonly applied in dental clinics, at-home care, and especially in educating children about proper brushing techniques.
