Abstracts

The dental fittings include dentures, archwires, anchorage appliances, and ligatures. The braces or the brackets are meant to place the misaligned or crooked teeth in place. Dental fittings are a group of substitutes and accessories that help in the restoration of the tooth and its functions. The dental fittings include dentures, archwires, anchorage appliances, and ligatures. The braces or the brackets are meant to place the misaligned or crooked teeth in place. Dentures are the commonly used dental fittings in the market for the tooth restoration. Some of the major causes of tooth loss are tooth decay, gingivitis, injuries, congenital defects, root canal failure, and excessive wear and tear.

Scope of the Report:

This report focuses on the Dental Fittings in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Private organizations and governments are taking initiatives to create awareness about oral health as it is also linked to heart diseases, low birth weight, and transmission of flu. For instance, World Health Organization (WHO) is taking initiatives and is framing oral health policies to effectively control oral health risks. The organization is also implementing community-based projects for the prevention of oral diseases. Initiatives such as these are creating high awareness and are generating the demand for oral care and implants, subsequently boosting the growth of the global dental fittings market. One of the latest trends that will gain traction in the dental fittings market in the coming years is the technological advances in implants. Some of the advances in dental implantation technology include Electron microscopy, 3D imaging, and virtual reality. 3D imaging plays a crucial role in implant surgeries, as it helps in achieving faster, more

accurate, long-term success, and reduces recovery time through precision computer-guided dental implant surgery. Furthermore, the usage of hybrid implants due to the technological advancements is gaining traction as these hybrid materials containing zirconium heads and titanium implants improve visual appearance, strength, and functionality of dental implants.

Due to the presence of a vast variety of manufacturers and several types of dental products across the world, this market appears to be highly-competitive. Major manufacturers are involved in M&A activities to manufacture and form distribution partnerships. Furthermore, manufacturers are forming strategies and are focusing on building a strong network of distributors and suppliers, which will help them establish their presence and remain competitive in the dental crown market.

The worldwide market for Dental Fittings is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
