According to our (Global Info Research) latest study, the global Dental Implants market size was valued at USD 4019.1 million in 2023 and is forecast to a readjusted size of USD 5364.3 million by 2030 with a CAGR of 4.2% during review period.

A dental implant is a surgical component that interfaces with the bone of the jaw or skull to support a dental prosthesis such as a crown, bridge, denture, facial prosthesis or to act as an orthodontic anchor. The basis for modern dental implants is a biologic process called osseointegration, in which materials such as titanium form an intimate bond to bone. The implant fixture is first placed so that it is likely to osseointegrate, then a dental prosthetic is added. A variable amount of healing time is required for osseointegration before either the dental prosthetic (a tooth, bridge or denture) is attached to the implant or an abutment is placed which will hold a dental prosthetic.

Global Dental Implants key players include Straumann, Envista, Dentsply, Zimmer Biomet, Osstem, etc. Global top five manufacturers hold a share over 70%.
