Abstracts

Dental infection or tooth abscess is the infection of teeth, gums and associated tissue caused by a bacterial infection. The abscess can occur at different regions such as periapical abscess occurring at the tip of the root, and a periodontal abscess occurring in the gums next to a tooth root. Tooth abscess leads to pus formation and if left untreated can lead to serious, even life-threatening, complications. The symptoms of a tooth abscess include severe, persistent, throbbing pain in the tooth which can radiate to the jawbone, neck and other associated parts of the head, fever, swelling in cheeks, swollen lymph nodes, sensitivity to hot and cold foods etc. The spread of infection results in foul smell and foul-taste in mouth. The periapical tooth abscess is the most dangerous as bacteria invade the dental pulp which is the innermost part of the tooth that contains blood vessels, nerves and connective tissue.

SCOPE OF THE REPORT:

This report studies the Dental Infection Treatment market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Dental Infection Treatment market by product type and applications/end industries.

The market for tooth abscess is driven by factors such as poor dental hygiene due to rise in risk factors such as time constraints due to fast lifestyle, sedentary lifestyles, not brushing your teeth twice a day and lack of flossing etc. Other strong factor is the high sugar diet and junk foods. High sugar diets have high propensity to cause a dental infection whereas junk foods are sticky and retain in the cavities of the teeth for longer times. Drinking sodas can result in slow dissolution of the dental enamel and can lead to rise in cavities due to the weakening of the natural physical barrier of the teeth.

The global Dental Infection Treatment market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Dental Infection Treatment.
