Dental and vision insurance are two types of supplemental health insurance designed to help cover the costs of dental and eye care services. Dental insurance is a type of insurance that specifically provides coverage for dental and oral health issues. The specific coverage and reimbursement ratio of dental insurance will vary depending on the insurance plan. The insured person needs to pay a portion of the cost when using the service, and the insurance company will cover part of the remaining cost. Vision insurance is generally designed to provide coverage for vision problems caused by illness or accidental injury. However, it is important to note that the specific content and coverage of vision insurance may vary from insurance company to insurance company and insurance plan to insurance company.
