Abstracts

The global Dental Pneumatic Sandblasters market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The pneumatic sandblasting machine drives special particles to the tooth surface through high-pressure airflow, and removes the attachments on the tooth surface that are not easy to scrape off. The sandblasting can instantly and softly clean the tea stains, smoke stains and soft food stains attached to the teeth, and can clean the pits and fissures of the tooth surface that the ultrasonic scaler cannot reach, and the sand-sprayed teeth are very smooth, and it is not easy to deposit tartar again.

This report studies the global Dental Pneumatic Sandblasters production, demand, key manufacturers, and key regions.
