## Abstracts

Dental restoration is the rehabilitation and restoration of the oral and dental tissues lost as a result of disease, inheritance, or trauma. The restoration is required to fulfil the aesthetic, psychological, and functional needs of the patient that demands co-ordination of multi-professional teams within and outside of dentistry. Various materials that are used in restorative dentistry include dental amalgams, dental cements, dental composites, dental ceramics and dental liners. These materials can be used across different branches of dentistry like prosthodontics, periodontics, and endodontics.

According to our (Global Info Research) latest study, the global Dental Restoration Supplies market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Dental caries is the destruction of dental hard tissues resulting in the decalcification of inorganic constituents and the dissolution of organic components and is caused mainly by the acid produced by microorganisms from the fermentation of dietary carbohydrates. It is one of the major reasons for the oral diseases. Owing to factors such as the changing lifestyles of people, the increase in consumption of sugars, the reduced intake of fluorides, and the lack of national programs to restrict oral diseases, the frequency of dental caries is increasing rapidly especially in the low and middle-income countries, subsequently boosting the growth of the dental restoration market.

This report is a detailed and comprehensive analysis for global Dental Restoration Supplies market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing,

this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

#### Key Features:

Global Dental Restoration Supplies market size and forecasts, in consumption value (\$ Million), 2018-2029

Global Dental Restoration Supplies market size and forecasts by region and country, in consumption value (\$ Million), 2018-2029

Global Dental Restoration Supplies market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2018-2029

Global Dental Restoration Supplies market shares of main players, in revenue (\$ Million), 2018-2023

#### The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Dental Restoration Supplies

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Dental Restoration Supplies market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include 3M, GC Corporation, Ivoclar Vivadent, Dentsply Sirona and KaVo Kerr, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

#### Market segmentation

Dental Restoration Supplies market is split by Type and by Application. For the period 2018-2029, the growth among segments provide accurate calculations and forecasts for consumption value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
