## Abstracts

According to our (Global Info Research) latest study, the global Depletion Mode Junction Field Effect Transistor(JFET) market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The depletion type junction field effect transistor is controlled by using a reverse bias voltage on the gate terminal. It is a three-terminal active device with amplification function and is the simplest type of unipolar field effect transistor. The depletion means that when  $U_{GS}=0V$ , there is a conductive channel between the drain and the source.
