Abstracts

According to our (Global Info Research) latest study, the global Dermocosmetic Products market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The field of dermo-cosmetics is a branch of science that combines cosmetology and dermatology. Simply put, it refers to specialized skin care products produced in consultation with dermatologists to improve the appearance of skin and treat various skin issues. Formulated for local application, dermo-cosmetics are made to preserve the health and beauty of skin, including the scalp and hair. Dermo-cosmetics differ from regular skin care products because they work deeply into the dermis, the second layer of the epidermis. Since the molecules in dermo-cosmetic products are finer, they are better able to penetrate skin cells.

The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States. More than one-third of the top 100 companies are headquartered in the United States, and 22.9% of the companies are located in France.
