According to our (Global Info Research) latest study, the global Design Manufacture Service (DMS) market size was valued at USD 11940 million in 2022 and is forecast to a readjusted size of USD 22460 million by 2029 with a CAGR of 9.5% during review period.

Design manufacture service (DMS) is a business model that combines contract product design with contract manufacturing as a service to other companies that have insufficient or do not possess the required resources. Often the customer is focused on other aspects of their business or their existing resources may simply be overloaded. DMS providers may also provide other services such as order fulfillment, logistics and aftermarket service.

Because of the high skill-levels required in each field, DMS firms specialize in different product categories. These might include medical devices, medical instruments, automotive, communications, etc. Typically, these are areas that require a relatively higher level of internal infrastructure or regulatory controls than the customer possesses. Certain industries including aviation and medical devices require special development and manufacturing practices required by international, Federal and local regulations.

The Global Info Research report includes an overview of the development of the Design Manufacture Service (DMS) industry chain, the market status of Consumer Electronics (IP Previously Owned and Contributed by The Customer, IP Previously Owned and Contributed to The Product by The DMS), Medical Instruments (IP Previously Owned and Contributed by The Customer, IP Previously Owned and Contributed to The
