Abstracts

The global Design Manufacture Service (DMS) market size is expected to reach \$ 22460 million by 2029, rising at a market growth of 9.5% CAGR during the forecast period (2023-2029).

Because of the high skill-levels required in each field, DMS firms specialize in different product categories. These might include medical devices, medical instruments, automotive, communications, etc. Typically, these are areas that require a relatively higher level of internal infrastructure or regulatory controls than the customer possesses. Certain industries including aviation and medical devices require special development and manufacturing practices required by international, Federal and local regulations.

Design manufacture service (DMS) is a business model that combines contract product design with contract manufacturing as a service to other companies that have insufficient or do not possess the required resources. Often the customer is focused on other aspects of their business or their existing resources may simply be overloaded. DMS providers may also provide other services such as order fulfillment, logistics and aftermarket service.
