Abstracts

The global DETDA Chain Extender market size is expected to reach \$ 283 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

DETTA (diethyltoluene diamine) is a highly efficient aromatic diamine polyurethane chain extender and curing agent. It features low viscosity, rapid reaction, good heat resistance, and improved mechanical strength of finished products, significantly shortening demolding time and is considered an important polyurethane raw material in the industry.

The upstream sector is deeply reliant on the petrochemical system. Core raw materials include toluene diamine (TDA) and ethylene, synthesized through alkylation processes (typically involving high temperature, high pressure, and specific catalytic technologies). Global sales in 2025 were approximately 50,000 tons, with an average selling price of \$4,086 per ton. The industry's gross profit margin is around 25%-35%.

This report studies the global DETDA Chain Extender production, demand, key manufacturers, and key regions.
