The global Dewaxing Solution for Pathology market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Dewaxing solution for pathology is a colorless and odorless organic solvent specially designed for the treatment of histopathology and cytology samples. It does not contain aromatic compounds and is an environmentally friendly substitute for xylene. It can be used in tissue dehydration and staining process. It is non-corrosive to the instrument and does not need to change the original procedure. It is safe, non-toxic, and has no peculiar smell. The transparent effect is the same as that of xylene. Soaking the tissue for a long time will not make the tissue brittle, but also enhance the effect of wax dipping, which is beneficial to sectioning.
