According to our (Global Info Research) latest study, the global Dexterous Hand Hollow Cup Motor market size was valued at US\$ 120 million in 2025 and is forecast to a readjusted size of US\$ 1870 million by 2032 with a CAGR of 47.8% during review period.

In 2025, global Dexterous Hand Hollow Cup Motor production reached approximately 530.7 k units with an average global market price of around US\$220 per unit. The Dexterous Hand Hollow Cup Motor is a miniature motor specifically designed for humanoid robotic hands or dexterous manipulators. Featuring a coreless (hollow cup) structure, it offers high power density, low inertia, rapid response, and precise positioning. Its compact and lightweight design enables high-frequency dynamic response and accurate fingertip control, making it ideal for end-effectors in service robots, surgical robots, and prosthetic hands requiring delicate gripping and precise movements.

As a core component of humanoid robots, the future industry development trends of Dexterous Hand Hollow Cup Motor focus on technological breakthroughs and market expansion. Companies such as Tesla have adopted hollow cup motor solutions, accelerating the implementation of this technology in the mass production process. Industry technical barriers such as coil design and winding processes have become critical to competition. The global high-end market is still dominated by foreign companies like Switzerland's Maxon and Germany's Faulhaber, but domestic manufacturers like Moons's are accelerating their catch-up by improving automation equipment levels, gradually substituting foreign shares. The demand for high power density and fast response in dexterous hand motors continues to grow, coupled with the

expansion of applications in traditional fields such as medical care and industrial automation, so the hollow cup motor market size is expected to expand significantly. Domestic enterprises need to seize the opportunities of robot cost reduction and localization, improve reliability and accuracy, to achieve a dual breakthrough in revenue and profit.
