According to our (Global Info Research) latest study, the global Dextrose Anhydrous market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Dextrose Anhydrous is a form of glucose made from starch of corn. Just like sugar, it is sweet in nature but contain around 20% less sweetness as compared to sugar made from sugarcane. Dextrose Anhydrous does not contain any water, produced in crystalline or powder form. Dextrose, like fructose and glucose, is a monosaccharide also known as simple sugar. Simple sugars can be combined to produce complex sugars such as sucrose. Human body metabolizes each unit of simple sugar whereas complex sugars are not easily metabolized by body. Dextrose Anhydrous is widely used as a nutrition supplement and a sweetener in food production. Apart from food, it is also used in beverage, animal feed, pharmaceutical and various other industries.

Dextrose Anhydrous market is mainly driven by the increasing food market. It is used in a vast variety of foods. Many food producers started using Dextrose Anhydrous instead of table sugar because of its better effects on human body. Manufacturers widely use Dextrose Anhydrous in food products and also used by athletes to replenish the muscle glycogen levels. Dextrose Anhydrous will witness a rise in the demand because of its use in medicines. Its demand is increasing because of vast benefits including can be used for making glucose injection, sodium chloride compound, lactic acid, sodium glucose injection, drug, etc. Another factor that fuels up the growth of the Dextrose Anhydrous market is that the affordable price because of cheap production cost. Most of the companies are located in U.S. and APEJ countries which are exporting Dextrose Anhydrous to all the regions. Hence, Dextrose Anhydrous market is expected to grow

during the forecast period due to its versatile benefits.
