Abstracts

According to our (Global Info Research) latest study, the global Diagonal Sealing and Labeling Machine market size was valued at US\$ 262 million in 2025 and is forecast to a readjusted size of US\$ 464 million by 2032 with a CAGR of 8.5% during review period.

In 2025, global sales of diagonal sealing and labeling machines reached 9,600 units, with an average selling price of US\$26,500 per unit. Diagonal sealing and labeling machines are automated packaging equipment that integrates sealing and labeling. They are mainly used for sealing square or bagged products diagonally and simultaneously applying labels. High-precision operation is achieved through a vision positioning system and servo control. Suitable for food, pharmaceutical, daily chemical, electronics, and FMCG packaging production lines, they feature high speed, stability, and reduced manual intervention. Upstream raw materials mainly include stainless steel structural components, PLC controllers, servo motors, sensors, labeling modules, and conveying systems. Downstream suppliers are concentrated in food processing plants, pharmaceutical manufacturers, and daily chemical and electronics packaging plants. Future development lies in modular design, intelligent visual inspection, and flexible multi-specification switching. Global total production capacity in 2025 is approximately 13,500 units, with an average industry gross margin of approximately 30%. Demand and business opportunities mainly come from automation upgrades, the growth of e-commerce small packaging, and the replacement of high-end packaging lines.
