The global Dialysis Care Package market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A dialysis care package is a disposable sterile medical device used for hemodialysis patients. It contains various items required for dialysis operations, such as treatment towels, pads, midriiffs, cotton balls, cotton swabs, tape, and iodophor , gloves, protective covers, patches, etc., which can facilitate medical staff to perform dialysis operations while protecting patients from the risk of cross-infection. The specific configuration and size of the dialysis care package can be freely selected according to different dialysis methods and patient needs. The method of using the dialysis care package is: first open the care package, take out the treatment towel, lay it on the patient's bed, then place the pad sheet, center sheet, etc. on the treatment towel, and then use other items in sequence according to the operating steps. Finally Collect used items, place them in care packages, and dispose of them as medical waste.
