Abstracts

Dialysis Catheter provides vascular access to the dialysis equipment for carrying out the procedure. These catheters have two separate tubes or dual-lumen, where the arterial port helps the blood flow out to the dialysis machine and the venous port returns the blood to the body. These devices can be used for both long-term and short-term access. However, long-term usage is not recommended.

Scope of the Report:

This report focuses on the Dialysis Catheters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The growing demand for anti-microbial coated dialysis catheters will drive the growth prospects for the global dialysis catheters market during the predicted period. With the growing probability of patients prone to infections from the weakened immune system, several vendors are offering antimicrobial catheters to reduce the risk of infections and prevent thrombosis. Some of the well-known antimicrobial catheters include Palindrome HSI–Heparin Coated & Silver Ion Antimicrobial Dialysis Catheter. The clot formations and microbial colonization on the catheter's surface can be prevented by employing the heparin coating and silver ion sleeve. Consequently, the antimicrobial benefits of these advanced products will drive the adoption rate of dialysis catheters in healthcare units and fuel the growth potential of the global dialysis catheters market. The Americas dominated the global dialysis catheters market and will continue to account for the major market shares during the predicted period as well. Factors such as the improvements in tip designs of dialysis catheters such as spiral-z-tip design, the introduction of advanced dialysis catheters such as Tal PALINDROME Dual Lumen

Catheters in the region, and the availability of reimbursement, will stimulate the growth of the dialysis catheters market.

The dialysis catheters market is characterized by the presence of diversified international and local vendors and is fragmented. These vendors are increasingly adopting strategic acquisitions and partnerships to come up with better innovative products. Since vendors are witnessing intense competition from their competitors, they are adopting collaborations and premium prices to sustain and survive in the intensely competitive environment.

The worldwide market for Dialysis Catheters is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
