Diamond Buffing Pads are specialized abrasives used for polishing and smoothing surfaces, typically in the stone, concrete, and tile industries. These pads are embedded with industrial-grade diamond particles, which give them superior durability and efficiency in removing scratches, stains, and imperfections. They are commonly used in floor maintenance, stone polishing, and surface finishing applications to achieve a high-gloss, smooth finish. The diamond particles, available in various grits, allow the pads to provide both coarse grinding and fine polishing depending on the job requirements.
