Abstracts

The global Diamond and Stone Removal market size is expected to reach \$ 4603 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Diamond and stone removal refers to the process of extracting diamonds and other precious stones from their settings in jewelry. Professionals performing diamond and stone removal need to have the necessary skills and tools to ensure the stones are extracted safely and without damage.

The global diamond and stone removal market is an established but highly fragmented business-to-business service market.

North America currently has the most visible and mature outsourced service ecosystem. The United States has a large network of precious-metal refiners serving jewelers, pawn shops, brokers, estate buyers and manufacturers. Competition is based on transparent weighing and assay, insured logistics, video-monitored processing, recovery of small melee diamonds, rapid settlement and optional gemstone purchasing.

Europe has a developed precious-metal refining sector, but stone removal is commonly incorporated into broader refining, luxury-jewelry repair and responsible-sourcing operations. Environmental compliance, chemical handling, chain-of-custody documentation and recycled-content verification are particularly important. The region offers attractive opportunities for cyanide-free processing, luxury-brand inventory recycling and documented recovered-gemstone supply. However, high labor, environmental and waste-treatment costs favor larger integrated refiners rather than small standalone operators.

Asia-Pacific has substantial long-term processing potential because of its large jewelry manufacturing, diamond processing and precious-metal trading industries. India, China, Hong Kong, Thailand and Japan generate significant volumes of manufacturing returns, old jewelry and stone-set inventory. Much of the activity remains in-house or is handled by local refiners, making the market less transparent than North America. Hong Kong-based Tin Fung, for example, provides precious-metal refining together with stone removal and gold-melting services. India's large gem and jewelry export industry also provides a substantial potential customer base for specialized recovery, screening and remanufacturing services.

The Middle East market is concentrated in the UAE, particularly Dubai, where gold refining, bullion trading and jewelry manufacturing are closely integrated. Al Etihad Gold offers diamond and gold separation as part of its refining platform, demonstrating the regional preference for vertically integrated service providers.

The Australia and New Zealand market is smaller but relatively organized. Providers such as Morris & Watson combine advanced chemical gemstone removal with precious-metal refining. Demand comes primarily from jewelers, manufacturers and precious-metal dealers rather than high-volume international scrap aggregators.

Report Scope

This report studies the global Diamond and Stone Removal demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Diamond and Stone Removal, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Diamond and Stone Removal that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Diamond and Stone Removal total market, 2021-2032, (USD Million)

Global Diamond and Stone Removal total market by region & country, CAGR,

2021-2032, (USD Million)

U.S. VS China: Diamond and Stone Removal total market, key domestic companies, and share, (USD Million)

Global Diamond and Stone Removal revenue by player, revenue and market share 2021-2026, (USD Million)

Global Diamond and Stone Removal total market by Type, CAGR, 2021-2032, (USD Million)

Global Diamond and Stone Removal total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Diamond and Stone Removal market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Elemetal, LLC, United Precious Metal Refining, Inc., Pease & Curren, Inc., Hi-Tech Precious Metals Refinery, U.S. Metals, Inc., So Accurate Group, Inc., Federal Refining, Inc., Maguire Refining, Inc., Al Etihad Gold Refinery DMCC, Hoover & Strong, Inc., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Diamond and Stone Removal market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
