Abstracts

Diaphragm pumps are categorized as positive displacement pumps that are used mainly in Industry applications, which involve pumping and lifting of heavy fluids, such as sludge, slurry, or mud. Sludge is a semi-solid slurry that is produced following the treatment of wastewater treatment or as a settled suspension from numerous Industry process.

According to our (Global Info Research) latest study, the global Diaphragm Pump market size was valued at USD 3217.5 million in 2022 and is forecast to a readjusted size of USD 4007.6 million by 2029 with a CAGR of 3.2% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The availability of low-cost labor and raw material will result in the increased number of companies investing in starting manufacturing plants in India. This will lead to the growth of the manufacturing and process industry which in turn, will lead to the rise in demand for the chemical and petrochemicals industries that include methanol, ethylene, or fertilizer production plants. These production plants have a high requirement for diaphragm pumps in various applications such as for transferring fluids from one process to another. Moreover, the country allows 100% FDI in the sector, which will also aid in the growth of the industry and will increase the demand for diaphragm pumps.
