## Abstracts

According to our (Global Info Research) latest study, the global Diaphragm Sensed Regulators market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Diaphragm Sensed Regulators (DSRs) are a type of pressure regulator that senses the pressure in the system and adjusts its output based on the sensed pressure. They typically use a diaphragm, which moves in response to pressure changes to control the flow of fluid through the system. DSRs allow precise regulation of the flow rate and pressure of the fluid, making them an important component of various applications, such as hydraulic systems, gas compression, and environmental control systems.
