## **Abstracts**

Dicamba is a chlorophenoxy group compound containing benzoic acid herbicide. Its main application is in the agricultural industry, where it is used to control the growth of annual and perennial broad-leaved weeds in different crops. Dicamba is available in various formulations having different properties based on crop application.

### **Scope of the Report:**

This report focuses on the Dicamba in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The growth of weed on agricultural lands results in the blockage of drainage pipes, spreads diseases and pests, competes with crops for space, light, water, and nutrients and affect the crop yield with increasing the frost risk. These disadvantages compel farmers to incorporate various methods such as plowing, minimum tillage, mulching, crop rotation and intercropping, and using chemicals such as herbicides to eliminate weeds. Weed-killers such as dicamba acts as an effective herbicide that prevents the growth of weed for a long term. Research analysis on the global dicamba market identifies the increasing use of dicamba herbicide to control the implications of weed to be one of the major factors that will have a positive impact on the growth of the market. The dicamba market appears to be highly concentrated. The industry research report provides a comprehensive analysis of the market's competitive landscape and the growth prospects for the vendors in the dicamba herbicide market. Additionally, the report provides information about the strategies adopted by companies to enhance their revenue shares in this competitive market.

The availability of limited agricultural lands in certain regions and increasing problems of

weed in croplands and non-crop lands in Europe are driving the demand for dicamba. It has been estimated that the demand for dicamba will increase in the forthcoming years due to the rising need for crops, which in turn, will drive the dicamba herbicide market.

The worldwide market for Dicamba is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
