## Abstracts

This report studies the Dicumyl Peroxide market, Dicumyl peroxide is primarily used in the manufacture of polymers and elastomers. Dicumyl peroxide is mainly used as cross-linking agent for polymers and elastomers. Polymers which can be cross-linked with organic peroxides are used to produce hose, wires, tires, rubber seals, etc. Dicumyl peroxide can also be used as flame-retardant synergist in expanded polystyrene (EPS). In that case, the peroxide is incorporated in small quantities in EPS, and will catalyse the flame retardant action in case of heating.

### Scope of the Report:

This report focuses on the Dicumyl Peroxide in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For industry structure analysis, the DCP industry is comparatively fragmented by manufacturers, but, it is concentrated by regions. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. Regionally, China is the biggest production area of DCP, about 85% production market share of the global production in 2017, also the leader in the whole DCP industry.

For price trend analysis, a key variable in the performance of DCP producers is downstream market demand. Generally, demands in developed countries are moderate, while demands in developing areas are in fast growth. China is the largest consumption region of DCP, reaching 17136 MT in 2017, followed by Europe and USA.

For trade analysis, the import and export business of DCP is frequent, with China the leading exporter. The import business in China is frequent, and local demand of high

end products cannot be met with the production. But overcapacity is increasing year by year,

The worldwide market for Dicumyl Peroxide is expected to grow at a CAGR of roughly 6.0% over the next five years, will reach 220 million US\$ in 2023, from 160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
