Dicyclopentadiene (DCPD) is a chemical compound which is a dimer of cyclopentadiene (CPD). Dicyclopentadiene products are obtained during the cracking process of high petroleum fractions. It is majorly used in the manufacturing of resins.

Scope of the Report:

This report focuses on the Dicyclopentadiene in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. DCPD is increasingly used in manufacturing poly-DCPD, that is used in manufacturing truck body, buses, tractors, and big containers. As the automotive industry is in high demand in APAC, the poly-DCPD market will witness high growth. Also, the presence of many manufacturers and their capacity expansion will also boost the growth in the DCPD market in APAC. The rising demand for bio-based EPDM is one of the key trends that will contribute to the market growth in the forthcoming years. The eco-friendly nature of the bio-based EPDM as it lowers greenhouse gas emission with lesser carbon footprint drives its popularity. The bio-based EPDM will witness stable growth in the coming years with the development of new grades and new applications. This will drive the growth of the DCPD market in the future.

The DCPD market is characterized by the presence of numerous vendors and is competitive. This market research report offers detailed information about the key areas the players currently focus on and the strategies they follow to sustain the market's competitive vendors.

In terms of geographical regions, APAC will be the major revenue contributor of the DCPD market throughout the forecast period. The growth of the end-user industries

such as construction and automotive will be a major factor driving the demand for DCPD in this region.

The worldwide market for Dicyclopentadiene is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
