Abstracts

The global Diesel Generator Sets market size is expected to reach \$ 25010 million by 2029, rising at a market growth of 7.1% CAGR during the forecast period (2023-2029).

Diesel genset is a self-propelled power station AC power supply equipment that uses diesel fuel, powered by an internal combustion engine, to drive a synchronous alternator to generate electricity and convert kinetic energy into electrical and thermal energy.

The key manufacturers of diesel generator sets worldwide are Caterpillar, Kohler, Cummins, Generac, Mitsubishi Heavy Industries, MTU, Wartsila, HIMOINSA, GE, Tahoe Technology and so on. The top four producers together account for more than 50% of the market share, with the largest producer being Caterpillar, accounting for 25%. The global origin is mainly distributed in North America, Europe, China, Japan, India, Latin America, etc. The Asia-Pacific region has the largest market with a 45% market share. In terms of product category, power less than 200KW occupies the major market share with 60%, followed by power between 200-500KW with 25%. In terms of its application, diesel generator sets are mainly used in household and commercial sectors, communication, industrial backup power, etc.

A diesel generator is the packaged combination of a diesel engine, a generator and various ancillary devices (such as base, canopy, sound attenuation, control systems, circuit breakers, jacket water heaters and starting system).

Diesel genset are used in places without connection to a power grid, or as emergency power-supply if the grid fails, as well as for more complex applications such as peak-loading, grid support and export to the power grid. Figure Picture of Diesel Genset
