A diesel generator is the packaged combination of a diesel engine, a generator and various ancillary devices (such as base, canopy, sound attenuation, control systems, circuit breakers, jacket water heaters and starting system).

Diesel genset are used in places without connection to a power grid, or as emergency power-supply if the grid fails, as well as for more complex applications such as peak-loading, grid support and export to the power grid. Figure Picture of Diesel Genset

Scope of the Report:

This report focuses on the Diesel Genset in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the world wide, major manufactures are Volvo, MTU, Kipor Power, Generac, MHI, Dresser Rand, MultiQuip, Himoina, APR Energy, GE Energy, Pramac, F.G. Wilson, JCB, Wartsila, Yanmar, Wasker Neuson, Atlas Copco, Kirloska, etc.

Even now, the major market are China, the other developing Countries, like India, Indonesia, Nigeria, showed huge demand potential. It is easy to predict, in the following five years, the developing countries will have a higher market share around the world. Meanwhile, with more and more manufacturers moved their manufactory to Southeast Asia, with lower labor cost, in the future, many OEM factories will appear in Southeast Asia to Northern Africa.

China became a major manufacturers around the world. Southeast Asia and India will expand their production share in the following five years. However, the technology barrier is still a matter of fact. Most of the factories in developing are OEM factories,

which assemble the diesel genset with diesel engine imported from USA or EU. The cores of almost 70% of diesel genset above 1500kw are imported from developed countries. With no evidence support the fact that such high technology diesel engine could be produced in developing countries.

The worldwide market for Diesel Genset is expected to grow at a CAGR of roughly 5.1% over the next five years, will reach 23500 million US\$ in 2023, from 17400 million US\$ in 2017, according to a new GIR (Global Info Research) study.
