An articulated dump truck is a dump truck with a hinge point and a swing ring between the cab and the body (or between the front and rear bodies). This design allows the front frame to rotate independently to a certain extent relative to the rear frame or body, thus having high maneuverability and flexibility. When the vehicle is driving on uneven roads, it can ensure that all wheels are in contact with the ground to maintain overall stability, passability and maximum productivity. This report mainly focuses on the diesel-powered articulated dump trucks market.
