Diet Tonic Water is a low-calorie version of traditional tonic water, typically sweetened with artificial or natural sweeteners instead of sugar. It is often used as a mixer in cocktails, particularly in drinks like the gin and tonic, but with fewer calories. Common sweeteners include aspartame, sucralose, or stevia, which provide sweetness without the added sugar. Diet tonic water retains the signature bitter taste from quinine, the key ingredient that gives tonic water its distinctive flavor. It's a popular choice for those looking to reduce calorie intake while still enjoying the refreshing taste of tonic water.
