Abstracts

According to our (Global Info Research) latest study, the global Diethylene Glycol Monoethyl Ether market size was valued at US$ 79.49 million in 2025 and is forecast to a readjusted size of US$ 103 million by 2032 with a CAGR of 3.9% during review period.

Diethylene glycol monoethyl ether (DE) is an organic compound. Its molecular structure is formed by connecting ethyl groups to a diethylene glycol skeleton through an ether bond. It belongs to the ether alcohol compound. It is a colorless, transparent liquid with a slight ether-like odor. It is soluble in water and a variety of organic solvents and has good solubility, low volatility and a high boiling point. As an important chemical intermediate, it is widely used in dyes, coatings, inks, detergents and other fields

At present, the competition pattern of the diethylene glycol monoethyl ether market is relatively concentrated. International companies such as Dow Chemical and Eastman dominate the global high-end market with their technological advantages and stable quality. Some Chinese chemical companies have advantages in mid- and low-end products and cost control.

From the perspective of industry prospects, with the increasing demand for environmentally friendly coatings and inks, the market share of high-boiling-point, low-volatility solvents will continue to expand. At the same time, as the global energy and chemical industries transform towards a low-carbon direction, green and low-toxic solvents have become the development trend of the industry, and the market space for diethylene glycol monoethyl ether is expected to expand further.
