The global Diethylhexyl Carbonate market size is expected to reach \$ 2 million by 2029, rising at a market growth of 3.1% CAGR during the forecast period (2023-2029).

Diethylhexyl carbonate is a synthetic oily ester that acts as a skin conditioning agent and emollient. It is also used in sunscreen formulations to help maintain active ingredient dispersion throughout the formulation providing light, non-greasy emolliency to the skin. Known for its low viscosity texture and good spreading properties, it is often used as a substitute for silicones and silicone ingredients such as cyclopentasilane. Commonly used regarding foundations, sunscreens, facial moisturizers, concealers, anti-aging products, bronzers/highlighters and moisturizers. It has a risk factor of 1, is relatively safe to use, has no effect on pregnant women in general, and is not acne-causing.

The main producers of Diethylhexyl Carbonate are Evonik, Beijing Lingbao Technology, etc. The largest producer is Evonik, occupying more than 70% of the market share. The global production regions of Diethylhexyl Carbonate are mainly located in North America, Europe, and China. In terms of its product categories, the market share of diethylhexyl carbonate with purity above 99% is higher, accounting for more than 60%. In terms of its applications, skin care is its top application area with over 70% market share, while the cosmetics segment holds about 25%.
