Abstracts

The global Difluorobenzophenone (DFBP) market size is expected to reach \$ 295 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

Difluorobenzophenone (DFBP) is an organic compound with the formula of $(\text{FC}_6\text{H}_4)_2\text{CO}$. In 2025, global Difluorobenzophenone (DFBP) production reached approximately 10,492 tons, with an average global market price of around US\$18.68 per kilogram.

As a pharmaceutical intermediate, DFBP is mainly used to produce the powerful cerebral vasodilator drug 'Flucarizine' and the new drug 'Duxil' for the treatment of Alzheimer's disease.

In the field of engineering plastics, DFBP is the core raw material of PEEK (polyetheretherketone), and 0.8 tons of DFBP monomer is consumed for every ton of PEEK produced.

The global market for Difluorobenzophenone (DFBP) is intrinsically tied to the fortunes of polyetheretherketone (PEEK), the high-performance engineering plastic for which it is the essential monomer. Currently, the supply landscape is concentrated among a limited number of specialized chemical producers with proprietary synthesis technologies. The primary driver for DFBP is the expanding application of PEEK in demanding sectors like aerospace, automotive, electronics, and medical implants. A key market trend is the push towards DFBP with higher purity and batch-to-batch consistency to meet the stringent requirements of advanced downstream applications. Geopolitical factors are also prompting considerations for supply chain regionalization. Significant growth opportunities arise from emerging fields such as electric vehicle lightweighting and high-frequency electronic components for 5G networks, which demand the unique properties of PEEK. However, the industry faces considerable obstacles, including complex manufacturing processes with high technical barriers,

volatility in the supply of key raw materials, and increasing environmental compliance costs. A fundamental market risk remains its heavy dependence on the single, albeit growing, PEEK industry cycle.

This report studies the global Difluorobenzophenone (DFBP) production, demand, key manufacturers, and key regions.
