Abstracts

According to our (Global Info Research) latest study, the global Digital Cable Set-Top Box market size was valued at USD 5190 million in 2023 and is forecast to a readjusted size of USD 6794.7 million by 2030 with a CAGR of 3.9% during review period.

Cable converter: Cable television represented a possible alternative to deployment of UHF converters as broadcasts could be frequency-shifted to VHF channels at the cable head-end instead of the final viewing location. However, most cable systems could not accommodate the full 54-890 MHz VHF/UHF frequency range and the twelve channels of VHF space were quickly exhausted on most systems. Adding any additional channels therefore needed to be done by inserting the extra signals into cable systems on nonstandard frequencies, typically either below VHF channel 7 (mid-band) or directly above VHF channel 13 (super-band).
