## **Abstracts**

Digital content management for sales (DCMS) applications encompass repositories, authoring tools, collaborative environments and interfaces for publishing, versioning and presenting content. These applications help many content owners distribute key sales-oriented and customer-facing materials to salespeople (both direct and indirect), who use these materials to more efficiently and effectively develop and close business. DCMS applications improve the delivery of internal- and external-facing content to salespeople. They support objectives such as improving engagement with prospects and clients, increasing win rates, increasing deal velocity and growing deal sizes. Commonly used to support long-cycle B2B and B2C sales processes, they also apply to indirect sales processes, such as detailing merchandisers on the retail selling floor.
