## Abstracts

The global Digital Couture market size is expected to reach \$ 81 million by 2029, rising at a market growth of 17.7% CAGR during the forecast period (2023-2029).

Digital Couture refers to clothing that is created entirely using digital technology, such as computer-generated graphics, 3D modeling, and virtual reality software. Unlike physical clothing, digital clothing does not exist in the physical world and can only be viewed and worn in virtual environments such as video games or social media platforms.

This report studies the global Digital Couture demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Digital Couture, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Digital Couture that contribute to its increasing demand across many markets.
