Abstracts

Digital Glass Cockpits acts as a multi-function display which helps the flight personnel to concentrate on most pertinent information simplifying the operation and navigation process onboard. It improves the situational awareness, safety and survivability. These digital glass cockpits are being incorporated into all types of aircraft including Fighters, bombers, Trainers, Airlifters and Helicopters to give them tactical advantage.

Scope of the Report:

This report focuses on the Digital Glass Military Aircraft Cockpit Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The glass cockpit first originated in the military aircraft in early 1970s and F111-D was the first aircraft to feature one. Most commercial and military aircraft have completely replaced the mechanical instrumentation and it remains mainly on the small general aviation aircraft due to cost considerations.

North America is the largest market for glass cockpits and holds majority share in the market. But a falling defense expenditure will reduce its market share in the forecast period. The share will be captured by the Asia Pacific region. Japan, China, and India will lead the growth in the region in the forecast period. Africa is currently a very small market, but the growing prosperity in the region will make it one of the fastest growing markets.

The worldwide market for Digital Glass Military Aircraft Cockpit Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in

2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
