Abstracts

The global Digital Heat Stroke Meters market size is expected to reach \$ 57 million by 2029, rising at a market growth of 5.2% CAGR during the forecast period (2023-2029).

The key manufacturers of digital heat stroke meters in the world include Kestrel (Nielsen-Kellerman), Extech (Teledyne FLIR), Kyoto Electronics Manufacturing, Hengxin AZ, A&D Company, Tsuruga Electric Corporation, Romteck, SATO KEIRYOKI MFG, and Century Construction, among which the top two manufacturers account for more than 25% of the market share. The global production of digital heat stroke meters is mainly distributed in North America, Europe, China and Japan, among which the top three production regions account for more than 70% of the market share. At present, North America is the largest production region, accounting for more than 40% of the market share. In terms of products, the portable type is growing faster than the desktop type, and its market share has exceeded 60%. In terms of application, industrial industry is the first application field, accounting for more than 75% of the market share, followed by military industry.

People who work in installations or with machines that produce a lower energy level or a high emission of temperature can occasionally suffer heat stress (by the influence of body temperature). This phenomenon can also cause physiological symptoms: spasms, feeling unwell and shock that can in some cases prove fatal.

Digital Heat Stroke Meter provides the most accurate determination of the heat stress index based on the cumulative effect of air temperature, air movement, relative humidity, and radiant heat. Digital Heat Stroke Meter can avoid heat exhaustion in public health, sports, military and industrial activities.
