According to our (Global Info Research) latest study, the global Digital Interactive Display Walls market size was valued at US\$ 5909 million in 2025 and is forecast to a readjusted size of US\$ 10953 million by 2032 with a CAGR of 9.2% during review period.

In 2025, global Interactive Video Wallm production reached approximately 2,225.8 K Sq.m, with an average global market price of around 2,580 USD/Sq.m.

Digital Interactive Display Walls refer to large-scale integrated display systems composed of multiple display panels (such as LED, LCD) or projection units seamlessly spliced together, integrated with touch, gesture recognition, or motion sensing technologies. These walls enable real-time interactive communication between users and displayed content (including images, videos, 3D models, and live data), breaking the one-way information transmission mode of traditional display devices. With modular design for flexible size customization, high-resolution visual output, and adaptability to various indoor and outdoor environments, they serve as a core carrier for immersive information dissemination and interactive experience creation across multiple fields.

Global demand for Digital Interactive Display Walls is growing rapidly, driven by the accelerated digital transformation of industries such as retail, cultural tourism, education, and smart cities, the rising demand for immersive customer engagement experiences, and the increasing application of data visualization in public management and corporate decision-making. Business opportunities lie in advancing technological innovation such as Micro LED and flexible display to enhance product performance and reduce costs, developing AI-driven intelligent content management and multi-modal

interaction solutions, expanding localized service networks in high-growth regions like the Asia-Pacific to seize smart city construction opportunities, and deepening scenario-based customization for vertical fields such as medical training and industrial digital twins to expand market penetration.
