## Abstracts

According to our (Global Info Research) latest study, the global Digital Laser Rangefinder market size was valued at USD 1394.4 million in 2023 and is forecast to a readjusted size of USD 2474.2 million by 2030 with a CAGR of 8.5% during review period.

A laser rangefinder is a rangefinder which uses a laser beam to determine the distance to an object, which has been in use as early as the introduction of lasers; it is a useful optical method for measuring distance. LRF is based on time-of-flight method, and it employs light waves. This technique is based on a transmission of a short pulse of electromagnetic radiation and the reception of back scattered signals from a target. The precision of the instrument is determined by the rise or fall time of the laser pulse and the speed of the receiver. One that uses very sharp laser pulses and has a very fast detector can range an object to within a few millimetres.

The key manufacturers of Digital Laser Rangefinder in the world are Vista Outdoor, NIKON, Elbit Systems, HILTI, Leica Camera, ZEISS, Mileseeey and Bosch, among which the top five manufacturers account for more than 50% of the market share. At present, Vista Outdoor is the largest manufacturer. The global production of digital laser rangefinder is mainly distributed in North America, Europe, China and Japan, among which the top three production regions account for more than 90% of the market share. In terms of product types, the growth rate of hand-held laser rangefinder is relatively fast, but the market share of telescope laser rangefinder is relatively high, more than 70%, followed by hand-held laser rangefinder. In terms of its application, sports is the largest application field, with a market share of nearly 30%, followed by military, forestry, and construction fields.
