According to our (Global Info Research) latest study, the global Digital Product Anti-theft Cable Puller market size was valued at US\$ 243 million in 2025 and is forecast to a readjusted size of US\$ 348 million by 2032 with a CAGR of 5.4% during review period.

The anti-theft pull cord is a security anti-theft device commonly used in the retail industry, usually to protect goods from being stolen. Its working principle is usually to connect a pull cord with an alarm system to prevent the goods from being illegally taken away.

The market for digital product anti-theft pullers (anti-theft displays) is in a rapid development stage, mainly benefiting from the popularity of consumer electronics and the increase in retail security needs. According to a research report by Langhong Technology, with the diversification of products such as smartphones, tablets, and wearable devices, the demand for anti-theft display products continues to grow. It is estimated that by 2026, the global anti-theft display product market will reach approximately US\$1 billion, with an average annual growth rate of approximately 15%.

In addition, anti-theft displays are moving towards miniaturization, wirelessness, and intelligence. For example, the wireless anti-theft display launched by Langhong Technology supports remote monitoring and alarm functions and has been adopted by brands such as Huawei, Xiaomi, and OPPO. This shows that anti-theft displays not only play an important role in retail security, but also become a key tool to enhance consumer experience and brand image.
