Abstracts

DRFM-based electronic warfare systems are installed in various defense platforms, such as ground-based military units, Unmanned Aerial Systems (UAS), and navy ships. The growth of the airborne electronic warfare systems and the upgrade of older air platforms are significant factors driving the demand for DRFM-based jammers. Other applications of DRFM-based jammers include Radar Environment Simulation (RES) testing. The RES testing procedure involves evaluation of radar systems in an anechoic environment during their designing phase. The shortcomings of radar systems are eliminated by incorporating design changes during radar development.

Scope of the Report:

This report focuses on the Digital Radio Frequency Memory (DRFM) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Based on platform, the Digital Radio Frequency Memory (DRFM) market has been segmented into commercial & civil and defense. The defense segment includes air, naval, land, and unmanned platforms.
