## **Abstracts**

Digital security solutions are gaining importance among large enterprises, government organizations, and SMBs because they protect critical information from unauthorized access and security attacks. They also protect computers and digital devices from malware, worms, and advanced security threats. Digital security has been gaining prominence over the years because of the increase in incidences of hacking. Since traditional defense mechanisms are not able to address complex and sophisticated threats efficiently, many organizations have considered adopting digital security solutions to actively manage and reduce security risks.

### **Scope of the Report:**

This report studies the Digital Security market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Digital Security market by product type and applications/end industries.
