Abstracts

Dihydroxybutanedioic acid is a white, crystalline organic acid that occurs naturally in many fruits. It is commonly mixed with sodium bicarbonate and is sold as baking powder used as a leavening agent in food preparation. The acid itself is added to foods as an antioxidant and to impart its distinctive sour taste. Dihydroxybutanedioic acid is used in many applications, food and beverages, wine, pharmaceutical, construction, cosmetic and chemical industry. For food, beverage and wine, tartaric acid is used for acidifying and enhancing the flavors of them. In pharmaceutical industry, tartaric acid is used as an excipient to prepare antibiotics, pills, tablets and some other medicines for heart disorders. In construction sector, tartaric acid is used in gypsum and cement to retard drying, and as a fluidizer of ceramics. In chemical industry, tartaric acid is used for photography, polishing in electronics and plastics industries. For cosmetic, tartaric acid is used as a basic compound in some natural body creams.
