## Abstracts

The global Diisopropyl Adipate (DIPA) market size is expected to reach \$ 1086 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

Diisopropyl adipate (DIPA) is an aliphatic dicarboxylic acid ester obtained by esterification of adipic acid and isopropanol. It belongs to synthetic ester chemicals and is usually a colorless to light yellow liquid with certain solubility, low odor, and good low-temperature flowability. It can be used as a plasticizer and solvent based additive. Common applications include flexibility modification of polymer and rubber formulations, dilution and rheological adjustment of coating, ink, and adhesive systems, as well as ester components in some lubricating and functional fluids. In 2025, global Diisopropyl Adipate (DIPA) production reached approximately 136 K MT, with an average global market price of around US\$ 5,076 per MT.

The main driving force for the demand for diisopropyl adipate (DIPA) comes from the continuous demand downstream for low odor, low migration, and more friendly formulation systems, especially in the context of stricter environmental and occupational health constraints. Some traditional high volatility or stronger odor solvents and plasticizing systems will be replaced by milder ester solutions. At the same time, the evolution of coating adhesives towards water-based, high solid content, and low volatility will also increase the demand for DIPA with high purity, low moisture, low acid value, and low color batch consistency; The focus of supply side competition will shift from simple prices to stable raw material and process control capabilities, impurity and odor management, compliance document completeness, and application support for the formulation end. Price fluctuations will be more affected by upstream costs of adipic acid and isopropanol, plant start-up, and logistics supply and demand constraints. This report studies the global Diisopropyl Adipate (DIPA) production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Diisopropyl Adipate (DIPA) and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
