Abstracts

The global Dill Seed Oil market size is expected to reach \$ 300 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Dill Seed Oil is steam distilled from the crushed dried, mature fruit of *Anethum graveolens*. Dill Seed Oil is pale yellow or almost colourless (when fresh) and very mobile. Its odour is light and fresh, warm-spicy and reminiscent of caraway and spearmint, although less sharp. The taste is warm, slightly burning, but pleasant and powerfully aromatic-sweet. In 2025, global Dill Seed Oil production reached approximately 59 MT.

The dill seed oil market is supported by growing demand for natural flavoring and fragrance ingredients across food, beverage, personal care, aromatherapy, and wellness applications. Its warm, spicy, herbaceous profile makes it useful in seasoning, pickling, herbal blends, fragrance compositions, and natural product formulations.

Clean-label and plant-based ingredient trends continue to favor natural essential oils over synthetic alternatives. Buyers are increasingly looking for traceable botanical ingredients with consistent aroma profile, food-grade quality, and compliance with cosmetic, flavor, and pharmaceutical standards.

India remains an important supply base for dill seed oil because of its cultivation, spice-processing capability, and established essential oil extraction ecosystem. Producers with integrated sourcing, steam-distillation capability, quality testing, and export documentation are better positioned to serve global B2B customers.

This report studies the global Dill Seed Oil production, demand, key manufacturers, and
