Abstracts

According to our (Global Info Research) latest study, the global Dimethyl Ether market size was valued at US\$ 2341 million in 2024 and is forecast to a readjusted size of USD 2694 million by 2031 with a CAGR of 2.1% during review period.

Dimethyl ether (DME) is a clean energy source and as it generates no sulfur oxide or soot during combustion, its environmental impact is low. Owing to its non-toxicity and easy liquefaction properties, DME is easy to handle and therefore can be used as a domestic-sector fuel (substitute for LPG), transportation fuel (diesel vehicles, fuel cell vehicles), power plant fuel (thermal plants, cogeneration plants, stationary fuel cells), and as a raw material for chemical products. Given the above-described superior properties, if DME were to become widely available in large volumes at a reasonable price, DME could be used as a fuel in a wide variety of fields.

Kaiyue, Jiutai Group, Lanhua Sci-tech, Shenhua Ningxia Coal and Yuhuang Chemical are the top 5 of global Dimethyl Ether, with about 25% market shares.
