According to our (Global Info Research) latest study, the global Dimethylmethoxy Chromanol market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Dimethylmethoxy chromanol mainly works as an anti-oxidant in cosmetic products. Lipochroman-6 is a high potency anti-oxidant that's believed to inhibit tyrosinase activity and peroxynitrite formation- one of the main culprits behind lipide peroxidation and cell damage (2 huge skin agers). It's supposed to work by capturing free radical nitrogen and oxygen molecules in the body. Lipochroman-6 is a synthetic analog of gamma-tocopherol, but has been proven to have >20 times its anti-oxidant activity. It can therefore be used in very low concentrations. While this ingredient is a relatively new one, extensive data exists demonstrating it as a potent antioxidant. You can find it in skin care products such as facial moisturizer, sunscreen and anti-aging treatment.
